

# Таблицы распределений

## Оглавление

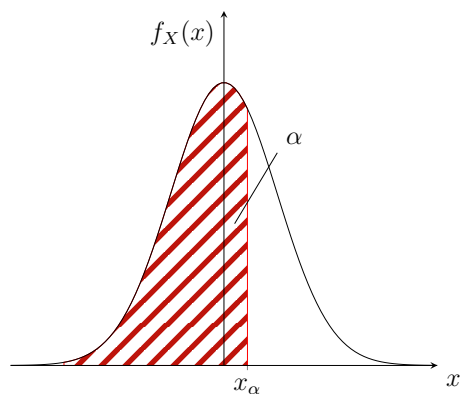

Таблица для нормального распределения . . . . .	2
Таблица для $\chi^2$ -распределения . . . . .	3
Таблица для $t$ -распределения . . . . .	4
Таблицы для $F$ -распределения . . . . .	5
$F(m, n): \mathbb{P}(\{X \leq F_\alpha\}) = 0.99$ . . . . .	5
$F(m, n): \mathbb{P}(\{X \leq F_\alpha\}) = 0.95$ . . . . .	7
$F(m, n): \mathbb{P}(\{X \leq F_\alpha\}) = 0.9$ . . . . .	9

# Таблица для нормального распределения

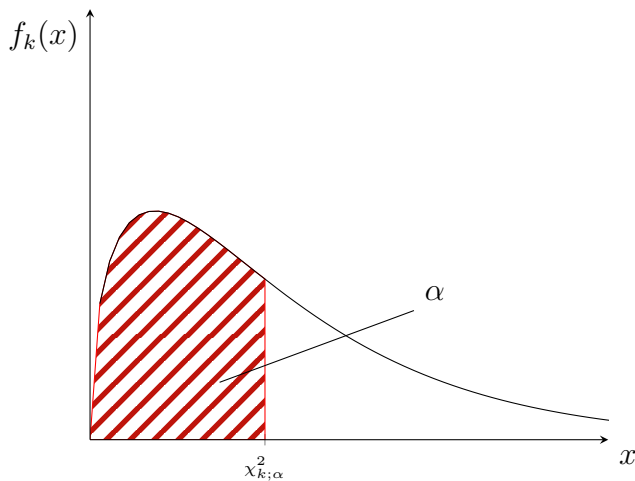

В таблице приведены значения вероятностей

$$\mathbb{P}(\{X \leq x\}) = \int_{-\infty}^{x_{\alpha}} \frac{1}{\sqrt{2\pi}} e^{-\frac{y^2}{2}} dy = \alpha.$$

Целые части и десятые доли числа  $x$  указаны в левом столбце; сотые доли числа  $x$  — в верхней строке.

## Таблица для $\chi^2$ -распределения

В таблице приведены такие значения  $\chi^2_{k;\alpha}$ , что

$$\mathbb{P}(\{X \leq \chi^2_{k;\alpha}\}) = \int_{-\infty}^{\chi^2_{k;\alpha}} f_k(y) dy = \alpha,$$

где  $f_k(y)$  — плотность  $\chi^2$ -распределения с  $k$  степенями свободы.

## Таблицы для $F$ -распределения

В таблице приведены значения  $F_{m,n;\alpha}$  такие, что

$$\mathbb{P}(\{X \leq F_{m,n;\alpha}\}) = \int_{-\infty}^{F_{m,n;\alpha}} f_{m,n}(y) dy = \alpha,$$

где  $f_{m,n}(y)$  — плотность  $F$ -распределения с  $m$  и  $n$  степенями свободы.

$$F(m, n): \mathbb{P}(\{X \leq F_{\alpha}\}) = 0.99$$
